

November 2016

Management Buyout Completed Successfully

We are pleased to inform you that Buss ChemTech AG is again fully in the hands of the company's management. The shareholders are composed exclusively of members of the Board of Directors and the Management Team. We were able to successfully complete the purchase on November 11th following four intensive months of negotiation after the majority shareholder filed for bankruptcy in July. Prior to this date, management owned a minority stake. Now, we are fully "at the helm" of the company.

The buyout has also led back to a familiar look and business formula. Our website has returned to the "old" look, but naturally with current content. And Buss ChemTech's products and services are only changing to the extent that we, as independent owners, are now again able to meet customer requirements more consistently. As the company moves ahead, we are committed to the steady and efficient implementation of your ideas to improve our procedures and engineering services.

We are immensely proud of the fact that the strong team at Buss ChemTech successfully navigated the buyout process and continues to stand "at the ready" in its usual steadfast manner. We are all looking forward to successfully shaping and expanding our business for a bright future.

Sincerely

Buss ChemTech AG
